1. Geometric Shapes

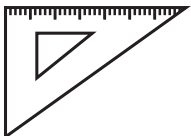

❖ Tick (✓) on the things similar in shape with the given shape on left side.

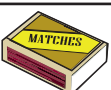

❖ Write the correct word/number in the given blanks.

	I am a
	I have sides and corners.
	I am a
	I have sides and corners.
	I am a
	I have sides and corners.
	I am a
	I have curved edge but no straight edge.
	I have corners.

- ❖ Take the given objects and keep it on the blank paper. Trace the edges of the given objects with pencil. Observe the figure and complete the table as shown.

Objects	Figure after tracing	Name of the figure
		Circle
	
	
	
	

- ❖ Complete the following table.

❖ Count and write the number of rectangles, squares, triangles, circles and colour the picture.

Rectangles <input type="text"/>	Squares <input type="text"/>	Triangles <input type="text"/>	Circles <input type="text"/>
---------------------------------	------------------------------	--------------------------------	------------------------------

- ❖ Incomplete figures are given. Complete it to make rectangles, squares and triangles by drawing lines as required. Count and write the total number of each in the appropriate shape given below it.

- ❖ Count and write the number of slanting, horizontal, vertical and curved lines used to draw the picture below.

Slanting lines = Horizontal (Sleeping) lines =
 Vertical (Standing) lines = Curved lines =

❖ Colour the boxes of numbers as per the information given in the table.

86	85	90	97	96	95
87	88	89	98	99	

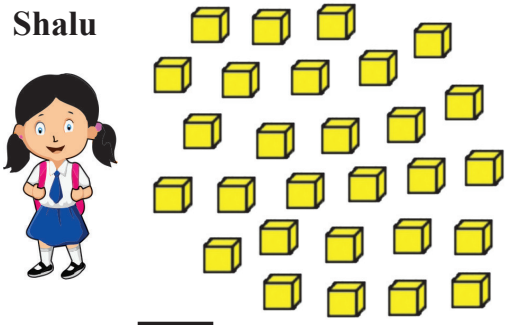

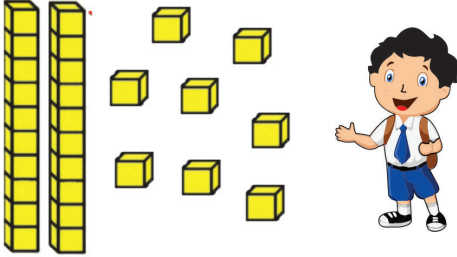

❖ Observe the solved puzzle and solve the remaining puzzles.

4. Let's count in groups

- ❖ Shalu and Rahim was asked to take out 28 blocks from a bag containing sticks of tens and loose blocks. Both of them took out 28 blocks as follows.

<p style="text-align: center;">Shalu</p>  <p style="text-align: center;"><input type="text"/> units</p>	<p style="text-align: center;">Rahim</p>  <p style="text-align: center;"><math>28 = 2 \text{ tens} + \text{ <input type="text"/> units}</math></p>
---	---

Whose counting is easier and faster ? Encircle that name.

- ❖ Help Mary to count pencils.

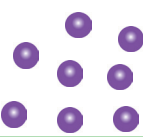

How many pencils are there in each box ?

What is the total of all pencils from all the boxes ?

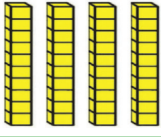

How many more such boxes are required to get total 100 pencils ?

5. Let's Identify the Numbers from the pictures.

7. Let's count in steps

- ❖ Observe on which numbers frog jumps. Encircle those numbers.

Write the numbers on which frog jumps.

1, 3, , , ,

- ❖ See on which numbers rabbit jumps. Complete the jumps by drawing dotted line as shown.

Encircle and write the numbers on which rabbit jumps.

1, 4, , ,

- ❖ See and write the numbers on which kangaroo jumps.

- ❖ Write the missing numbers in steps of 2.

- ❖ Write the missing numbers in steps of 3.

❖ Start from any number in the first row and ○ the numbers by counting in steps of 8.

12. Let's decide Smaller or Bigger

❖ See, how to find smaller or bigger number.

86, 27 (When Tens place is different)

Tens	Units
8	6

Tens	Units
2	7

compare tens first

8 tens > 2 tens

86 > 27

If tens place is different, then compare tens place of two numbers and then decide smaller or bigger.

24, 29 (When Tens place is same)

Tens	Units

18. Let's measure Length

❖ Measure the length with the given unit.

Things	 (Handspan)	 (Arm)	 (Pencil)
Length of black-board			
Height of table			
Breadth of door			
Length of floor tiles			
Length of window			

❖ Whose handspans are more in numbers, if the length of the table is measured by your teacher and your classmate. Encircle it.

Teacher

Student

❖ Measure the lower width of a door with span, feet and arm. Write the width in the given boxes.

feet

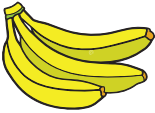

handspans

arms

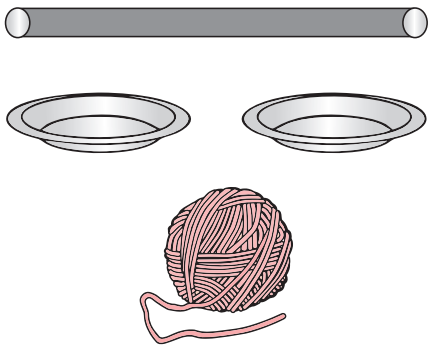

( Even if the door width is same. Why above measures differ ?)

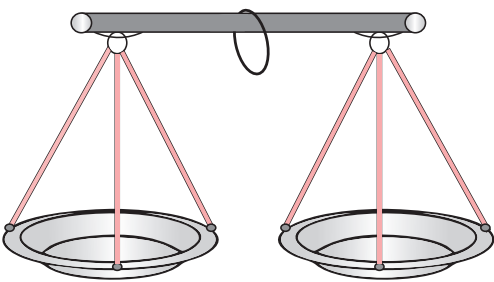

19. Let's Weigh

❖ Which of the two has more weight? Tick (✓) in that box.

 <input style="width: 60px; height: 30px; margin-left: 20px;" type="checkbox"/>	 <input style="width: 60px; height: 30px; margin-left: 20px;" type="checkbox"/>

 <input style="width: 60px; height: 30px; margin-left: 20px;" type="checkbox"/>	 <input style="width: 60px; height: 30px; margin-left: 20px;" type="checkbox"/>

❖ Use following things to prepare balance scale (weighing scale)

Get the help from teacher or friend to make the balance Scale.

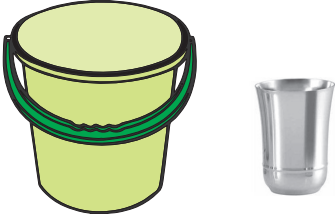

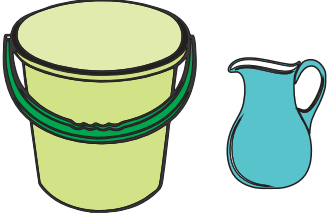

❖ Use your balance to weigh the things. For balancing use seeds, marbles, blocks etc. and complete the table.

Things	Seeds/Marbles/ Blocks
	e.g. 10 seeds

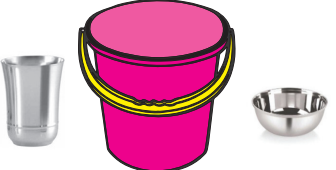

(Teachers/Parents should get this activity done in their presence only.)

20. Let's measure Capacity

- ❖ First estimate/guess and then actually measure it. Compare both the readings.
(Teachers/Parents should get this activity done in their presence only.)

	Your Guess	Actual Measure
	Bucket will hold glass of water.	Bucket hold glass of water.
 vessel of water will fill the bucket. vessel of water filled the bucket.
 jug of water will be required to fill the bucket. jug of water filled the bucket.
 bowls of water will fill the bucket. bowls of water filled the bucket.

- ❖ Tick (✓) that box which shows the capacity of the vessels in ascending order.

Balloon's colour	Red	
Number of Balloons	8					

❖ Observe the picture and count the toys.

Toys	cars	kites	dolls	bats	balls
Mansi has					
Raju has					

1)	How many cars Mansi has ?	
2)	How many kites does Raju have ?	
3)	What is the total number of kites with Mansi and Raju ?	
4)	How many total balls they have ?	
5)	What is the total number of toys with Mansi ?	
6)	How many pairs of bat-ball does Raju have ?	
7)	How many more bat does Mansi have, than Raju ?	

22. Let's Complete the Patterns

❖ Observe and complete the patterns.

						
						
						
AA	BB		DD			GG
2	12	22	32			

❖ Use the given numbers and pictures to design a pattern. (you can use as many pictures and numbers as you want)

				1	2	0	3	4
				5	6	7	8	9

23. Before Learning Multiplication

❖ Ana, Samira, Ahamad and Sachin planted two saplings each in school garden.

Ana	Samira	Ahamad	Sachin	=	total saplings planted			
				=				
<input style="width: 30px; height: 30px; border: 1px solid black;" type="text"/>	+	<input style="width: 30px; height: 30px; border: 1px solid black;" type="text"/>	+	<input style="width: 30px; height: 30px; border: 1px solid black;" type="text"/>	+	<input style="width: 30px; height: 30px; border: 1px solid black;" type="text"/>	=	<input style="width: 30px; height: 30px; border: 1px solid black;" type="text"/>

4 times 2 saplings means

Total 8 saplings were planted.

$2 \times 4 = \boxed{8}$ Read as \rightarrow 2 into 4 is equal to 8

❖   

 + + =

times birds \rightarrow means total birds

❖ As per the activity solved above, solve the following example.

1) How many dishes are there ? dishes

2) How many chaklis in each dish ? chaklis

3) So total number of chaklis are chaklis

5 times 3 means = + + + + = 15

$3 \times 5 = \boxed{}$

Instructions for teachers/parents : 1) The objective of this workbook is to inculcate the habit of self-study in students and also to provide opportunity to excel in expected learning outcomes. 2) After learning the concepts and content given in the textbook, the students are expected to complete the activities given in this workbook. 3) Ample colourful pictures, figures and diagrams are used to make the workbook attractive. Mathematical puzzles /riddles are included to make it more enjoyable. 4) Activities in the workbook are designed as per the learning outcomes, hence every student sooner or later will achieve the expected learning outcomes. So teachers should focus on the process of learning rather than the product. 5) Teachers should plan as per the local situations so that every student can complete the activities in the said academic year. 6) At many places some sample activities are solved, so by observation student will solve remaining activities on their own. 7) If necessary, teacher /parent should give guidance to the students in person or in group. 8) Teaching of Mathematics should be accompanied by real life examples from the local surroundings so that the students can relate themselves and understand it in better way. Also encourage and motivate students to find such examples. 9) To evaluate the students' performance is not the only aim and objective of this workbook but also to get rid of 'Mathophobia' in students. Rather they should start loving Mathematics. 10) Teacher should always start with a positive thought and strong belief that 'Every child can learn Mathematics.' Encourage students to participate in everyday teaching-learning process with the help of this workbook.

Let's make

Puppy and house by paper folding art.
For that you require some square papers and colours.

1. Puppy

1. Fold the paper in half, again give one more fold to get small triangle.

2. Hold the triangle downwards unfold it.

3. Fold both the corners of the triangle as shown.

4. Fold the top corner to the back.

5. Give your puppy a face by drawing eyes, nose and tongue.

2. House

1. Fold the paper in half.

2. Fold the edges to the centre as shown.

3. Fold to the centre.

4. Turn the figure and fold the left and right edges to the centre.

5. Open the top left and right flaps.

6. Spread out the corners and flatter.

7. Fold on dotted line.

8. Draw the door and window. House of paper is ready. Colour it.
